CODY LEEPER
WEB DEVELOPER

PROFESSIONAL SUMMARY

Led teams in a variety of industries, ranging from the US Army to current position as the sole web developer and system administrator for a successful start-up company. Excited to learn all aspects of full-stack development, persistent, inquisitive, continually seeking challenges, and fascinated with emerging technologies. A fast-learner, adept at working under pressure, with great communication skills, meticulous attention to detail, and able to collaborate well.

PROFESSIONAL EXPERIENCE

Senior Web Developer & System Administrator   2017 - PRESENT
Freshmovemedia | Virginia

Executed over 50 installations of various domains from concept to deployment.
  Client interface:
     -Provided solutions to implement client visions and generate conversions.
     - Demystified concepts of design and deployment.
     - Received continual positive client feedback.
  Concept Design:
     - Created wireframes and drafted web pages on a development platform.
     - Implemented best practices for project management and timelines.
  Deployment:
     - Migrated websites from development platform to live domain.
     - Ensured reliability and functionality of websites through alpha and beta testing.

Automation Technician II   JAN 2015 - DEC 2017
GLOBALFOUNDRIES | New York

Promoted and awarded through saving company $200,000 in maintenance costs.
  - Developed SQL databases and connected to Excel spreadsheets, enabling gathering and visualization of tool metrics.
  - Developed a prediction program for decreasing unscheduled downtime.
  - Improved overall equipment performance from 73% to 85% through participation in 6 Sigma projects and Total Productive Maintenance (TPM) with engineering teams.
  - Conducted data mining for various tool sets.
     - Provided engineers proper information to better understand recurring alarms.
     - Enabled engineers to predict critical failures and create better planned-maintenance schedules.

Nodal Switch Team Lead   JULY 2010 -DEC 2014
United States Army | North Caronlina

Supervised inventories of equipment equaling over $700,000 with 100% accuracy and accountability.
  - Trained over 200 personnel in the use of several different secure communication systems, including UHF, VHF, FM/AM, and satellite radio.
  - Maintained over 100 Cisco/Brocade switches and servers minimizing unnecessary communication losses.
